Experience

ASQUARED Tech/ VitasenseAI

May 2025 – July 2025

AI/ML Intern (Backend & API Development)

- **Constructed** a FastAPI service deploying the best-performing model to production, powering real-time recommendations on vitasenseai.com.
- **Integrated** the prediction API with the React frontend for real-time results.
- **Trained and evaluated** 4 models (XGBoost, Random Forest, SVM, Decision Tree) to predict vitamin and mineral deficiencies from health survey data, selecting the top performer by F1-score.
- **Debugged** pipeline inconsistencies between the dataset and live API to ensure reliable predictions.

Falcon Overseas

February 2025 – April 2025

Software Engineering Intern

- **Architected** the FastAPI/Uvicorn backend powering all three product features, integrated end-to-end with the React frontend, using GitHub for version control and team collaboration.
- **Constructed** a RAG-based FAQ chatbot using FAISS and SentenceTransformers, live at falconoverseasedu.com serving 10,000+ users.
- **Assembled** a SQL-driven recommendation engine matching students to top-5 fits across 300+ universities, routing unmatched profiles to counselors.
- **Designed** an adaptive visa interview simulator (4 visa types, 10 LLM-generated questions per session) with automated scoring and personalized feedback from the LLM.

Projects

Schedio [\[Project link\]](#)

- **Designed** a MERN-stack recruitment platform, similar to LinkedIn for student code portfolios, deployed on Vercel and connecting 500+ colleges across India with recruiters.
- **Built** social engagement features (likes and comments on project portfolios) to drive recruiter and peer interaction, alongside JWT-based role access control and 150MB file uploads via GridFS.
- **Integrated** RapidAPI plagiarism detection and Gemini-powered code explanations to automate candidate evaluation, reducing manual recruiter effort.
- **Constructed** domain and skill-based recruiter filtering with code browsing, enabling precise candidate-to-role matching.

Client-Server Chat Application (Java) [\[Project link\]](#)

- **Built** a multi-client chat system using Java WebSockets, supporting multiple concurrent rooms with admin roles and password-protected access.
- **Designed** a command-based protocol for room management, private messaging, and admin controls.
- **Utilized** thread pools to regulate concurrency across multiple clients, ensuring thread-safe message broadcasting and stable connections.

Certifications

- **Microsoft Azure Fundamentals** — Microsoft | Issued July 2026 | [Link](#)
- **GitHub Foundations** — Microsoft | Issued Jun 2026 · Expires Jun 2028 | [Link](#)
- **Google AI Essentials** — Google | Issued May 2026 | [Link](#)

Skills

- **Languages:** Python, JavaScript, Java, C/C++, HTML, CSS
- **Frameworks & Tools:** React, Node.js, Express.js, FastAPI, Flask, Neo4j, REST APIs, Git, Postman, RAG, LLMs
- **Databases, Cloud & DevOps:** MongoDB, MySQL, FAISS, AWS, Docker, Kubernetes, Jenkins, Nginx, CI/CD, Jest, Agile

Education

KMIT (JNTUH affiliated), Hyderabad, India

September 2022 – July 2026

B.S. Computer Science

CGPA 9.04/10 (≈3.6/4.0)

- **Relevant Coursework:** Data Structures & Algorithms (DSA), Operating Systems (OS), Database Management Systems (DBMS), Computer Networks (CN), Object-Oriented Programming (OOP Java), Software Engineering, Multithreading & Concurrency, Cloud Computing, Machine Learning, Artificial Intelligence
